## 1 Revision

This policy is to be maintained and reviewed by the Adelaide University Scuba Diving Club (AUSC) Committee.

## 2 Application

This policy applies to all AUSC equipment hire, including wet suits, BCDs, regulators, tanks, weight belts, weights, gloves, hoods, boots, masks, snorkels, fins, Shark Shields etc.

## 3 Equipment hire requirements

- Equipment will be hired to current financial members only.
  - Positive proof of certification and active club membership must be presented to the committee member / club representative before any gear is hired out;
- Members are not to hire equipment on behalf of non-members.
- Club equipment may be used by club members involved in an Open-Water (O/W) training program provided there is a scuba diver instructor present during all of these activities. These students may not check out club equipment for any other purposes;
- In the advent of gear being in short supply (due to demand or servicing), preference will be given to those diving on organised club dives, to those doing non-club dives.
- It is the responsibility of the member who is hiring the equipment to check that the equipment they are hiring is in good working order (including adequate air fill) prior to removing the equipment from the club rooms. Refer Section 4 for required checks.
  - Equipment failure should be reported to the Equipment Officer or another committee member ASAP.
- A maximum of two tanks, and one set of dive equipment (i.e. one buoyancy compensator (BC), one wet suit, one regulator set, and one set of weights) may be checked out to a single member.
  - Exception may be made with tanks for club trips / low-peak season, at discretion of AUSC committee.
- Any member who hires out equipment assumes full responsibility for the return of that equipment in the same operational condition as it was received in and also accepts responsibility for any replacement or repair costs if lost or damaged.

## 4 Equipment hire checks

Divers hiring club equipment should carry out the following checks prior to leaving the club rooms:

- Air cylinders have appropriate pressure (a fill gauge is available);
- Cylinder valves are of a type matching the first stage to be used (i.e. DIN or yoke);
- If applicable, cylinder O-rings are present and in good condition;
- The first stage to be used 'mates' effectively with the cylinder valve without detectable leak;
- Weight belt is long enough for diver girth and has sufficient weights;
- BCD inflates and deflates correctly, and dump valves operate correctly; and
- Bottom timer or dive computer indicates sufficient battery power.

## 5 Equipment hire discount

There may be times when a discount is applied to equipment hire based on 'student' status, pre-arranged trip discounts, or credits as a consequence of other current AUSC policies (e.g. boat sitting, or training etc.).

### 5.1 Student discount

The club may offer discounts or maximum payments ("caps") to students based on current equipment pricing.

Student discounts and caps are offered to not only University of Adelaide student members (as defined in the AUSC Membership Policy), but to students of any recognised educational institution (as defined by the Australian Government Department of Education and Training) or secondary school.

Both full-time and part-time students are eligible for discount, provided that a student identification card can be sighted by the relevant committee member / club representative.

Eligibility for student discounts or caps ceases for non-continuing students who complete their studies in:

- Semester 1 - midnight on 31 July; and
- Semester 2 - midnight on 31 December.

These dates are as per AUSC Membership Policy, with expiry of student services and amenities fees. This provides consistency between student discount and student status expiry dates.

## 6 Equipment hire payment

- All fees associated with equipment hire will be paid for before the equipment is hired out, with the exception of club boat dives and club trips, whereby the organiser may choose to charge for equipment hire etc. after the dive/trip.
- Equipment to be used for club boat dives should be collected on the morning of the dive. If a member chooses to hire equipment before the club dive and takes the equipment with them (i.e. on Thursday for the Saturday dive), then they will be required to pay for the equipment before it is taken from the club rooms at non-club dive hire rates and there will be NO refund given if the member decides not to dive.
- No refunds will be given for equipment hired, but not used.

## 7 Equipment return

- It is the member's responsibility to ensure that all equipment is returned on time. Additional fees equivalent to current weekly dive hire rates will be incurred if equipment is not returned by its due date. Equipment hire is for one week which runs from Thursday to the next Thursday.
- All equipment is to be returned properly washed and cleaned.
- If circumstances arise where you are unable to return gear, you must let a committee member know prior to the return date.
